

General Care Instructions for Maintaining Fabrics:

- Vacuum the upholstered furniture regularly by gliding over the surface with a soft brush attachment (upholstery attachment)
- Always fluff, flip and rotate any removable cushions to ensure even wear
- Smoothen attached cushions and tuck excess upholstery into the sides or back
- For furniture that contains velvet upholstery, beyond the regular cleaning regime of using a vacuum cleaner, use a soft brush or specialist velvet brush and run it over the surface gently in a single direction
- Engage a professional cleaner once every year to professionally clean the sofa
- Avoid placing fabric upholstered furniture in direct sunlight, especially those with dark fabrics as the colour will fade quicker than usual
- Blot up any spills with a clean, dry, white cloth immediately (do not rub as it will damage the fabric)
- Use a suitable cleaning agent if you would like to prevent further staining
- Use a hair dryer on the lowest heat setting to evenly dry the fabric
- Do not dry clean or machine wash fabric cushion casings
