

#### General Care Instructions for Maintaining Leather:

- Keep your leather free from dust and dirt
- Use a soft untreated cloth, or a vacuum with a soft brush attachment
- You should aim to apply leather protection at least twice a year, and clean it just as often.
- If you are using a new leather care product, make sure that you test it first in an area that is not normally visible
- For minor spots and spills, wipe up any excess liquid immediately with a clean absorbent cloth or sponge. Do not use soap or soak the stain heavily with water. This may cause more damage than the stain itself
- Do not use cleaning solvents, furniture polish, oils, varnish, abrasive cleaners, detergent soaps, or ammonia water
- For butter, oil, or grease stains, wipe off excess with a clean dry cloth, and then leave alone as the spot should dissipate into the leather after a brief period
- For minor or slight scratches on the surface, use chamois or clean fingers to gently buff the scratch. If needed, moisten lightly with distilled water to work scratches out
- Protect your furniture from exposure to the sun as the leather colour will fade when exposed to sun and direct light
- Leather also dries out faster when placed underneath air conditioning so it is recommended to have a humidifier placed in the same room as the leather furniture piece
